SUMMARY

Through six years of graduate school education and research, I have developed skills in:

- Creative problem solving and experimental design
- Developing detector systems and software to acquire and analyze data
- Quantitative analysis of large data sets
- Producing data visualizations using matplotlib and ROOT
- Programming and scripting with C++, python, and bash
- Collaborating with colleagues locally and internationally
- Presenting results at conferences and collaboration meetings
- Writing technical and academic documents

EXPERIENCE

PhD Researcher, University of Victoria

JAN 2013 - MAY 2016

Designed, assembled, and commissioned thermal neutron detector system using tubes of helium-3 for the Belle II experiment. Developed and tested data acquisition system for helium-3 tubes. Oversaw deployment and operation of this detector system in Japan, and analyzed data recorded by them. Calibrated helium-3 tubes at UVic. Simulated helium-3 tubes and neutron source

MSc Researcher, University of Victoria

SEPT 2010 - AUG 2012

Investigated a new technique in particle identification in gaseous detectors. Developed and tested algorithms to implement this new technique.

Laboratory Instructor, University of Victoria

SEPT 2010 - APR 2016

Instructed undergraduate students on proper laboratory technique and equipment use. Taught experiments in introductory physics, electricity and magnetism, and laboratory electronics. Evaluated student progress and graded lab reports.

EDUCATION

Doctorate in HIGH ENERGY PHYSICS, **University of Victoria**

MAY 2017

Thesis: "Thermal Neutrons in Phase I of Belle II Commissioning"

Advisor: Prof. Michael Roney

Masters of Science in HIGH ENERGY PHYSICS, **University of Victoria**

AUGUST 2012

Thesis: "Cluster Counting Studies in a SuperB Drift Chamber Prototype"

Advisor: Prof. Michael Roney

Bachelor of Science in APPLIED PHYSICS with MATHEMATICS minor, **Carleton University**

DECEMBER 2009

SKILLS

Computing

Advanced Knowledge	C++, python, ROOT, LINUX, Object Oriented Programming
Intermediate Knowledge	JAVA, Excel, EPICS, WINDOWS, ubuntu, SL6, BASH, L ^A T _E X, svn, git, Virtual Machines, JUPYTER, XML, Confluence
Basic Knowledge	HTML, MATLAB, matplotlib, SQL

Hardware

Expertise in | Detector development, DAQ software development
Equipment | CAEN, VME, NIM, Digitizers, Computer-Electronics interfaces, Power supplies

Other

Particle Physics, Data analysis, Statistics, Public speaking, Problem solving, Collaborative research, Teaching

CONFERENCES AND PRESENTATIONS

During my PhD studies, I travelled to the KEK lab in Tsukuba, Japan for meetings of the Belle II collaboration on five separate occasions, and presented remotely many other times. At these meetings, I presented the status of the project that I had been working on to colleagues and answered questions about my project.

<i>Oral Presentation</i> , Canadian Association of Physics Annual Congress (Ottawa, ON) Presented results of experiments conducted at the KEK physics lab in Tsukuba, Japan.	2016
<i>Oral Presentation</i> , Winter Nuclear and Particle Physics Conference (Montreal, QC) Presented results of experiments conducted at the TRIUMF physics lab in Vancouver, BC.	2012
<i>Oral Presentation</i> , Canadian Association of Physics Annual Congress (Calgary AB) Presented results of experiments conducted at the TRIUMF physics lab in Vancouver, BC.	2012
<i>Poster Presentation</i> , University of Victoria (Victoria BC) Presented an introduction to the SuperB experiment.	2011
<i>Oral Presentation</i> , Canadian Undergraduate Physics Conference (Edmonton AB) Presented a summary of studies I had done for my BSc Honours project.	2009

FIELD WORK

TRIUMF , Vancouver, Canada: Prototype drift chamber at M11 Performed shift work for recording data, adjusted beam settings to produce different particle momenta, changed the position of the prototype chamber, problem solved issues with the experiment	2011
KEK , Tsukuba, Japan: BEAST II Phase I Installed helium-3 tubes in the SuperKEKB commissioning detector; BEAST II. Performed data acquisition shifts, attended accelerator meetings, problem solved issues with the experiment	2016

PUBLICATIONS

<i>First Measurements of Beam Backgrounds at SuperKEKB</i> Vahsen, S., et al.	2017
<i>Improved particle identification using cluster counting in a full-length drift chamber prototype</i> Caron, J.-F., Hearty, C., Lu, P., So, R., Cheaib, R., Martin, J.-P., Faszler, W., de Jong, S. , Beaulieu, A., Roney, M., de Sangro, R., Felici, G., Finocchiaro, G., and Piccolo, M.	2014
<i>SuperB Technical Design Report</i> Baszczyk, M., et al.	2013
<i>Prospects for Observing the Standard Model Higgs Boson Decaying into $b\bar{b}$ Final States Produced in Weak Boson Fusion with an Associated Photon at the LHC</i> Asner, D.M., Cunningham, M., de Jong, S. , Randrianarivony, K., and Santamarina, C.	2010

INTERESTS AND ACTIVITIES

Professional: Problem solving, Data analysis, Programming, Data acquisition systems, Hardware-software interface, Physics, Experimentation, Detector development, Simulation of detector systems, Research and development
Personal: Photography, Science Fiction, Travel
